ffAveStreams Download Crack Tool Download Tool Crack Upload File Keep.[Effect of Exosomes derived from
Adipose Mesenchymal Stem Cells on Dorsal Horn Neuron Immune Responses]. To investigate the effect of
adipose mesenchymal stem cells (ADSC)-derived exosomes on anti-inflammatory responses of dorsal horn
neurons in the spinal cord injury (SCI) rat. ADSCs were isolated from the inguinal fat of Sprague Dawley rats,
and cultured in vitro. The exosomes were extracted from the conditioned medium of ADSCs. The effect of
ADSCs-derived exosomes on the dorsal horn neuron immune responses in SCI rats was studied using SCI rat
model. Compared with the control group, proinflammatory cytokine (TNF- α , IL-1 β) levels in the spinal cord of
rats in the group subjected to SCI decreased after exosome infusion. Compared with the control group, the
expressions of p-p65 and IL-6R of dorsal horn neurons in the spinal cord of rats in the group subjected to SCI
decreased after exosome infusion. ADSCs-derived exosomes could inhibit the inflammatory responses in dorsal
horn neurons in the rat SCI model. 1 7 7 1 5 . 9 9 9 8 rounded to the nearest integer? 2 2 Round -
