I have a 20 year old son, he is HIV positive. My son does have a job and is in a halfway house. I want to move my son out of state because I feel we can do a better job of his life there. I also want to foster a little girl, she is 5 years old, and has autism. Her mom doesn't have a job but it is very sad. I am not opposed to helping the mom out with rent but I know she will need help with food and clothing. I have a 12 year old daughter. I also have a part time job. I am married to a wonderful man and we have 2 other children, all under the age of 5. My husband has a full time job and is a navy veteran. He has been told if they place him in a top military school he can go to flight school. I have several

months of child care, weekend and night. I am not opposed to marriage. I love my family and I just want to help a little girl. Hello! We are pretty open about our family situation (because some are afraid of getting HIV) so feel free to ask us any questions about our situation or what we are looking for. We are committed to giving this foster mom experience. We would love to have you and your family be part of our family too! I am interested in foster care in your area. My husband is a U.S. Marine and I am looking for a job now that the kids are out of school. My oldest (10 years old) is diagnosed with ADHD and needs a therapist to help her. She is also on medication for this, and my youngest (5 years old) is on medication to help with her seizures. I am currently employed, but am looking for a job with more hours and more flexibility. I would consider a home with an indoor pool (my husband's birth family is from China and this is a big deal for him). I have two grown

children and a grandson that I love very much. My youngest daughter is going to school for child care, and has her first job. My oldest daughter is about to graduate high school and she
