"HyperMotion Technology" in FIFA 22 gives teams and players the ability to use these stats and the data from real-life players to build characters from the ground up. Players can now experience exactly what it takes to make an impact on the pitch in real-time, and their performance will be measured against the data of professional players. For instance, a player who performs the same sequence of actions as a striker can be overpowered by his intelligence. Player-specific movement alterations: Players that excel in close-range, aerial duels, or any area of action where they rely on skill to outsmart their opponent will find their movement altered to fit their style in the new game. FIFA 22 introduces a new "acceleration" system: Acceleration should respond to how a player moves and how quickly he wants to accelerate. We want players to feel the power of their movement, and how they excel in one area of the pitch can be quite different to their style on the opposite flank. This system relies on how players "cut" and how quickly they accelerate the ball, and as a result, players that rely on creativity in the final third of the pitch are rewarded for their style. Newly aligned shot impacts: When players change direction, and when they use their left and right-footed shots, a new system relies on the orientation of the ball and how high or low it is to make the impact for that particular shot type more realistic. The outcome is a more powerful impact, as well as some visible effects, such as the kick up of the ball and the way in which it strikes the target. Better accuracy with run offs: We have implemented a number of artificial intelligence improvements to the run-off as a response to the new acceleration system. Players should now not be able to tap the D-pad and have the ball bounce away from them. FIFA 22 introduces new controller and UI customisation: The PS4 Pro has no problems with the PS4, but the Xbox One can have issues with PS4 custom configurations. We are making two custom configurations available to players: Xbox One X or DualShock 4. These can be selected by choosing the Game Mode in the Options screen. Players can also use the Options button to create their own custom configurations. To adjust the edges of the UI, gamers can use the Arrow key and scroll the D-pad to where they want the UI to be

features a wealth of new team and player objects to unlock, allowing players to customize their squad and make their own unique team. FIFA Street – A brand new and more authentic experience of football street football. Complete new techniques and drills in single player or team, or join the community to create your own street football matches and claim your own turf. Use FIFA Street-inspired ball physics to become a smoother and more agile striker or pass into space as a player, either solo or in a team. FIFA 2K16 – The most authentic version of FIFA ever featuring a comprehensive roster of real-world athletes. Take on rival teams and players from around the world using official ball physics. Includes all current FIFA and UEFA leagues, friendlies, and tournaments. FIFA 2K16 Season Mode – FIFA 2K16 Season Mode is a new way to experience and create your favorite teams in Madden NFL or FIFA. Play the season calendar from July 2015 to May 2016, compete against friends and teams, earn rewards, all while building your roster to compete for the Championship. The new seasonal calendar has regular events like Friendly Matches, Playoffs and Seasonal Cups as well as four seasonal world tours (Americas, UEFA, CONCACAF and Asian) providing a total of 48 competitions. CHAMPIONSHIP PERFORMANCES – Winning your division, qualifying for the playoffs, or winning the Playoffs as a team will reward you with Championship Performances. These may be earned by all modes and can be used as rewards in the Career Mode, FIFA Ultimate Team, or FIFA 2K16. PLAYER POSITIONING MADE EASIER – For all modes in FIFA 2K16, players can now make precise movements by using a new “Virtual Trainer”. Virtual Trainer allows players to move players quickly and easily into proper positions. PREDICTIVE REAR TACKLE – Predictive Rear Tackle technology helps predict where to hit an opponent. For example, if a defender tries to tackle a player while in a backward movement, the AI will predict this before executing the tackle. This prevents the defender from being caught out. This technology is able to move quicker and hit harder. RATINGS & WINS
