Air-to-Air Combat in War Thunder is life-like both in its look and its feel, but in order to hit what you're aiming at, you need an edge on the opposition. It's here that DCS: Mosquito FB VI comes into play. A true-to-life digital replica of the most famous fighter/ground attack aircraft used by the RAF in WWII, the Mosquito FB VI uses state-of-the-art combat flight dynamics based on real combat reports of the time, a 1:1 scale design, dynamic weather effects and powerful combat sounds. The Mosquito FB VI has a wide array of firepower. It can carry 4x Browning.303 machine guns. It also has 4x Hispano Mk.II 20mm cannons with an effective rate of fire of about 150 rounds per minute. But its true weapon is the DB 610 liquid fuel rocket pod. It can carry 250kg bombs and 2x DP-803 or DP-802 rockets. The 4000lb and 5000lb bombs are mounted in the bomb-bay on the sides of the airframe and underneath the wings. The DP-801 and the DP-803 and DP-802 are found on the wings, with an effective rate of fire of about 50 rounds per second. This amazing fighter was designed to carry heavy loads for hundreds of miles with minimum fuel consumption and can be truly regarded as an "air-to-air attack" weapon. The Mosquito's outstanding manoeuvrability and high speed performance made it a difficult aircraft for the Luftwaffe to intercept. Its speed and agility can be tested in our free-flight mode. Fliers should be aware of the controls and the game mechanics. This aircraft is a pure dogfighter. Always check the situations and the other pilots! This feature is available on both singleplayer and multiplayer versions.

supremo Bernie Ecclestone has called Austin the 'fastest' city in the
USA but has admitted the Texas city lacks some obvious
entertainment infrastructure, so he can see why it was not selected.
Austin held last year's debut race and secured a deal to host three
future races, but the city missed out on joining three others
shortlisted for more races, including New Jersey. Ecclestone is also
understood to have thought New Jersey could have been an option.
Liberty Media, the company that is buying the sport from his CVC

consortium, was said to have wanted to hold races at New Jersey's venue in the heavily populated city of Metuchen. However, other cities that had expressed an interest in hosting F1 have been more vocal in recent weeks and have been more open about their infrastructure to offer. The former Hockenheim circuit in Germany was deemed too far from F1's core territory and also did not appear to have the infrastructure to support a race, so New Jersey may be the best option.
