On login you can drag and drop the 'Sidebar IP' gadget into your sidepanel The 'Sidebar IP' gadget can be dragged & dropped into the sidepanel. Q: The meaning of "Northbound" The wiki defines "Northbound" as one of the different way of entering and exiting a country. Do I understand that right that Northbound means something specific and different than the other ways? A: Northbound is an expression that refers to a road, on or from the north. It's defined as such in the following wikipedia page: Northbound runs north or north-west. In most cases, it simply refers to travelling from the north. In some cases, it refers to travelling from a northern part of a country. Krishna

The IP Address File - Create/delete IP address alias. Summary Have you ever had to enter the IP address manually to a website or FTP server? Most of us have had this problem at least once. Did you ever wonder why it takes so long for your home or office network to connect to the internet? Did you wonder if the reason was because it was taking so long to communicate with the server's IP address? In most cases you can enter the website's IP address in the address bar of your web browser. Did you ever wonder why it took so long? Why does it take so long to connect to a specific website? One reason for this time lag is that the browser first contacts the DNS server. What is a DNS server? It is a server on your network that translates

website or FTP server addresses to IP addresses. IP addresses are very long strings of numbers. To quickly communicate with the internet, we have assigned a domain name to our computer. The domain name is also a very long string of numbers. You
