## StyleMagic YA Added

StyleMagic added support for Google Play Music and MOG. Now you can import your playlists right into the mod. The introduction of the Play Music/MOG import means we're going to have to update the API key for the Google Play Music API. If you currently own a license for the Play Music/MOG API key, you will need to notify the developers if you want to keep using that key. Please follow the instructions in the Mod's info page to do so. Note that we are only giving you this opportunity, because it is an API Key for a Service, not a License to a Product. We can no longer provide the product to you, in this case, the Play Music/MOG API Key. Note that the developers of the Play Music/MOG API may change their API at any time. As such, we can no longer guarantee that the mod can support this content. At this point, we encourage you to begin the upgrade process, and then remove your API key upon completion. If you choose to continue using this API key, you will most likely have to switch over to the Google Play Music Key, as we have only given you this chance to switch, due to the fact that it is an API Key, not a Service license key. Please follow the instructions in the Mod's info page to do so. Mod archive is optimized for the Kobo eReader. The new Kobo 7 e-readers have even less functionality than the e-ink Kobo 3, the only one that supported 2D HTML5, but the archive's list of styles has been updated accordingly. We have added the new styles to the Kobo 7 list as well. If you were on a 3, you will need to install the new styles via the 2D Read Modes.
