The next time that youre in need of technical support for your computer, find out what version of BIOS is running on your computer. Then, download the corresponding version of the agent that youre using. For security reasons, if you use a special version of the agent to update your system, make sure that you only connect to the Internet through a secure connection. This will prevent someone else from making changes to your computer or getting malware to infect your computer. If possible, also download the agent using a different source than the one from which you usually download programs. This will prevent someone else from gaining access to your password. To prevent you from having to install the BIOS agent on each computer that you use, we recommend that you use the automatic update feature that is included in the agent. Finally, dont forget to install the BIOS Agent Plus key that you have downloaded. For this, open the BIOS Agent Plus exe file and follow the onscreen instructions.
